Automotive software for dealerships, fleets and mobility businesses in India and the Middle East

OVERVIEW

Spare Parts Sales App

Our spare parts sales app helps dealer parts counters, retailers and distributors sell online, manage stock and serve customers from one platform.

Buyers find the part they need, pay in the app and track their delivery, while your team keeps inventory accurate with live stock levels and barcode scanning.

BUILT FOR

- Spare parts retailers and distributors
- Dealership parts counters
- Workshops and garages buying parts
- Fleet operators

FEATURES

What you get with Spare Parts Sales App

01 **Search and filters**
Buyers find the right part fast by name, category, brand or specification.

02 **Real-time inventory management**
Track stock levels live and automate reordering so critical parts never run out.

03 **Barcode scanning**
Scan parts in the app for quick, error-free entries and inventory that stays in sync.

04 **Real-time delivery tracking**
Live order status and location updates, with customer notifications at each stage.

05 **In-app payments**
Secure checkout supporting multiple payment methods with instant processing.

06 **Built-in customer support**
Chat and call support inside the app for quick resolutions.

07 **Android and iOS apps**
Apps for Android and iOS, so buyers can find and order parts from their phone at any time.

08 **Catalogue, product pages and reviews**
Category screens, detailed product pages and customer reviews help buyers choose the right part with confidence.

WHY IT MATTERS

The difference it makes to your business

01 **Fewer stock-outs**
Live stock levels and automated reordering keep critical parts available.

02 **Accurate orders**
Barcode scanning and precise search reduce errors in inventory and order processing.

03 **Happier customers**
Easy search, secure payment and live delivery updates make buying parts simple.

04 **More sales**
A parts store on your customers' phones, with support built in, helps you grow parts sales.

HOW WE DELIVER

How we deliver Spare Parts Sales App

01 **Load your catalogue**
Parts, categories, brands, prices and stock come in from a spreadsheet or your current system.

02 **Set up payments and delivery**
We connect your payment gateway and set delivery areas, charges and order statuses.

03 **Brand the app**
The app is published under your name, logo and colours on Android and iOS.

04 **Train your team**
Counter and warehouse staff learn to scan stock, pick and pack orders and answer customer chats.

05 **Launch and review**
After launch we review orders and stock levels with you and tune the catalogue and offers.

FAQ

Questions about Spare Parts Sales App

What is a spare parts sales app?
It is an online store and stock system for parts sellers. Workshops, fleets and vehicle owners search, order and pay for parts from their phone, and your team manages stock, orders and delivery behind it.

How do customers find the right part?
They search by name, category, brand or specification and narrow the results with filters. If you need search by VIN or vehicle model, we scope it against your parts catalogue data.

How can customers track their orders?
Order status, delivery progress and purchase history are all visible in the app, with a notification at each stage.

Can we sell both OEM and aftermarket parts?

Yes. OEM and aftermarket parts can be listed side by side in the catalogue, each with its own price and stock, so buyers choose by budget and requirement.

How is the spare parts app priced?

The ready-made app has a one-off set-up fee for your branding and catalogue, plus a licence that includes hosting, updates and support. Custom features are quoted at a fixed scope.
